

BIOME BALANCING SERUM

BUILDS RESILIENCE

Establishes a healthy skin foundation

SUPPORTS BALANCE

Adapts to your unique skin biome to calm and soothe irritated skin

DELIVERS RELIEF

Targeted serum that supports the restoration of your microbiome to promote healthy-looking skin

Introducing the first bioactivated skincare serum engineered to balance your unique skin biome for optimal health.

This innovative, personalised skincare solution leverages your individual biology to transform the skin's ecosystem.

This advanced spore based topical formula adapts to your skin microbiome, creating a solid cornerstone for healthy skin. Ideal for all skin types and conditions, the spore-based Biome Balancing Serum tailors to your specific needs, enhancing resilience and supporting a strong skin foundation.

OUR BIOME COMMITMENT

We are committed to using biocompatible ingredients. Therefore, our serum does not contain any added fragrance. The compounds used in added fragrances can compromise the skin microbiome.

The expected and unique scent of the SIV™ Biome Balancing Serum is a result of the biocompatible ingredients used. This clean, earthy scent dissipates quickly.

SKIN-IDENTICAL INGREDIENTS

Bacillus is naturally found in nature in the soil and in the ocean. Your skin knows and recognises this bacteria.

The rest of the ingredients are skin-identical fatty acids.

SQUALANE

Biomimetic oil, molecule derived from non-GMO sugarcane that mimics squalene, beneficial in promoting skin hydration

CAPRYLIC/CAPRIC TRIGLYCERIDE

A mixture of caprylic and capric fatty acids derived from coconut oil; helps replenish skin's surface and helps it to resist moisture loss

GLYCERYL CAPRYLATE

A natural, plant-based, emollient derived from glycerin and plant fatty acids; restores the oils of the skin, regulates the skin moisture and acts as a humidifier to the skin

BACILLUS

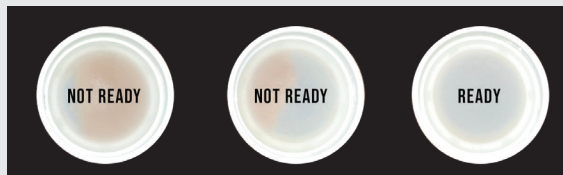

A proprietary blend of Bacillus spores activates a healthy skin foundation and visibly improves skin, positively influencing your unique skin biome and establishing balance. Bacillus spores lay dormant in the formula and are designed to activate from the natural heat, oils and water from the skin. This allows the spores to change and improve the skin microbiome by targeting overgrown bacteria while facilitating the growth of other essential species – effectively balancing the skin microbiome.

USER GUIDE

Suggested use: Use once a day.

Shake vigorously before use

*pictured: bottom of the dropper

Gently tap bottom of the dropper to apply 2–5 drops directly to clean, dry face once daily. Pat and massage into skin.

For optimal results: apply after toner and before moisturiser.

Compatible with any routine.
No contraindications.

HOW TO USE AT HOME

Step 1 – Cleanse or tone

Step 2 – Add Biome Balancing Serum (as per instructions above)

Step 3 – Moisturise

Step 4 – Add SPF

HOW TO USE AT THE BACK BAR

SIV™ Biome Balancing Serum can be used in post-care after:

- Dermaplaning
- Chemical Peels
- Waxing
- Microdermabrasion
- Microneedling (after 24 hours)
- Used as a post-service serum

SIV™ Biome Balancing Serum can help support inflammation and reestablish the skin microbiome after the treatments recommended above. It can also be included in facials for all skin types and skin concerns.
