

PREGNANCY SUPPORT

with scientifically tested **LGG®**, **ASTARTE™**, and **ISTILOS™** bacterial strains

Probiotics are vital to regimens that support a mother and baby's health from preconception through pregnancy and beyond. Oral probiotics optimize the gut microbiome and seed a woman's vaginal microbiome with *Lactobacillus* species that inhibit excessive nonbeneficial bacteria proliferation.**

Lactobacillus species do this without inducing inflammation, thus supporting fertility and promoting successful pregnancy outcomes. These probiotics may also benefit the developing infant, including supporting healthy skin development and sharing beneficial bacteria through breast milk that seed and support an infant's gut microbiome.**

**Designed to Support Mom
& Baby Before, During, &
After Pregnancy****

**20B CFU LGG®
5B CFU ASTARTE™
Pre & Postnatal Support
For Mom****

**20B CFU LGG®
.1B CFU ISTILOS™
Pre & Postnatal Support
For Baby****

Clinically tested ingredients in a proprietary blend

- 20B CFU **LGG®**: *L. rhamnosus* LGG®
